Servant Leaders

The poster features a blue and yellow starburst graphic behind the text. The entire content is enclosed in a blue double-line border with decorative corner pieces.

February 2010

Dear Parents,

Every year the school obtains funding through the STAR course programme to give students exposure to Tertiary training options and career opportunities. Some courses are run at school but the bulk of them involve students travelling to a different campus between one and four days.

Opposite is a list of the courses that are available to KingsWay students and the dates these courses are on. To minimise disruption to the academic programme most students will only attend one external course per year. Because places are so limited students need to indicate their first, second and third preference and will be given this opportunity when they fill out the form themselves. Places are allocated on a first in, first served basis.

The courses are provided at no cost to the student but parents are responsible for arranging transport to and from the venues.

Students will receive confirmation of the courses they have applied for and we request a \$10 bond for each course which is refunded upon course attendance and completion of the feedback form. Confirmation for a course is given six weeks before the course commences.

These courses provide a great opportunity for students to explore what a future course and career will be like. We trust you will discuss these options with your son/daughter and assist them in making a decision about what courses they should apply for.

If you have any queries please don't hesitate to contact me directly regarding this programme.

Miss Gilling
 STAR Course Coordinator
